Cochlear™ Wireless TV Streamer
Quick guide for CP900 Series users

Features of your Cochlear Wireless TV Streamer

- Enjoy high quality streamed audio direct to your CP900 Series Sound Processor from your TV, stereo, computer or other similar device.
- Supports both analog and digital input.
- Reconnects automatically if you leave the room and return within 5 minutes.
- Install it and forget it - just click a button to watch TV.

The TV Streamer plugs into an ordinary wall socket and plugs directly into your audio device. The TV streamer will stream stereo sound through your sound processors from up to 7 metres away.

Product overview

Getting Started

Adjusting the volume
How to:
To change the volume, use the volume control on the TV streamer. Make sure that your sound processors are comfortably adjusted before you change the settings with the volume control. In most cases you only need to make this adjustment once, since the TV Streamer will store the most recently set volume level.

Mono/stereo control
How to:
The two-position Mono/Stereo switch may be used to set Stereo or Mono audio streaming.
For bilateral fittings, the switch should preferably be set to the Stereo position.
For unilateral fitting it should be set to the Mono position.
Cochlear™ Wireless TV Streamer
Quick guide for CP900 Series users

Pairing with your CP900 Series Sound Processor

A. Plug your TV Streamer into the wall using the power cord and micro-USB socket on the TV Streamer.

B. Plug the audio cable into the mini-jack audio input socket on your TV Streamer and connect it to the audio source.

C. Switch off your CP900 Series Sound Processor.

D. Press the pairing button on your TV Streamer once.

E. Your TV Streamer is in pairing mode.

F. While pairing mode is active, switch on your sound processor.

The activity indicator flashes orange and you have 20 seconds to pair your sound processor.

A blue indicator light flashes to show that pairing has been successful.

Tip! Press the pairing button a second time to pair to Channel 2 on your sound processor(s), and again for Channel 3.

Note: If you are not wearing your sound processor at the time of pairing, the blue flashing light will change to orange warning that your coil is not connected.

Support

For full details about the Cochlear Wireless TV Streamer, please refer to the User Guide that was packaged with your TV Streamer, and the Wireless Accessories User Guide.

Using your Cochlear Wireless TV Streamer

Start streaming using your sound processor

A. Turn on your sound processor and TV Streamer.

B. To select another channel or stop streaming.

Start streaming using your CR230 Remote Assistant

Method 1: Turn on your sound processor and TV Streamer. Turn on your CR230 Remote Assistant.

Long-press the upper button on your sound processor once. The sound processor flashes a blue light to indicate audio is streaming.

Long-press the Telecoil button. *Tip! Long press the button a second time to select Channel 2, and again for Channel 3.*

When your audio device is turned on, audio will start streaming through the TV Streamer. To stop streaming, short-press the Telecoil button.

Method 2: Turn on your sound processor and TV Streamer. Turn on your CR230 Remote Assistant.

From the Home screen, press the right arrow button until you see the Stream screen. Scroll down the list to the channel you want to use and press OK.

When your audio device is turned on, audio will start streaming through the TV Streamer. To stop streaming, select Off on the Stream selection screen.

Start streaming using your CR210 Remote Control

A. Turn on your sound processor and TV Streamer. Turn on your CR210 Remote Control.

B. To select another channel or stop streaming.
