

BRING ON THE PERFORMANCE

AB's smallest, lightest, behind-the-ear processor

The **Naída CI Q90** sound processor from Advanced Bionics provides unique, groundbreaking features that help you to effortlessly hear better in any environment. The smallest, lightest processor from AB, Naída CI Q90 combines new technology never before seen in a cochlear implant system with proven, unique solutions for the best possible hearing wherever you go.

WHAT'S NEW IN THE NAÍDA CI Q90?

Simply Automatic

With **AutoSound™ OS technology**, your Naída CI Q90 intelligently analyzes and automatically adapts to the sound around you, so you hear your best wherever you go without having to change programs or adjust any settings.

More Advanced Noise Solutions

The **StereoZoom feature** uses the front and back microphones on both processors to zoom in on a single voice in a noisy environment, so you can chat one-on-one with less effort in extreme noise.

Hearing Comfort in Challenging Situations

The **WindBlock feature** automatically reduces wind noise for greater comfort in windy environments like a golf course or the beach.

The **SoundRelax feature** automatically dampens unexpected loud sounds, such as door slamming or clanging dishes, for a more pleasant listening experience.

The **EchoBlock feature** improves the sound quality in reverberant environments you encounter, like museums, galleries, and places of worship.

Smaller, and Lighter, with Improved Battery Life

The cost-effective and eco-friendly range of **PowerCel™ batteries** now includes new, smaller **PowerCel 110 Mini and 170 Mini batteries** for flexible power options, extra comfort, and up to 36 hours of battery life.

...and the Naída CI Q90 still has all of the proven, powerful features of the Naída CI Q70 for hearing in noise, hearing on the phone, hearing in water, as well as offering the largest portfolio of wireless connectivity options.

AB is currently accepting upgrade preorders for the Naída CI Q90. Contact your hearing healthcare professional or AB Customer Service to learn more and find out if you are eligible for an upgrade!
